

# FLOW MEASUREMENT TRANING SET

Flow measurement training kit is designed to observe flow measurement methods and techniques. The training set is designed in accordance with the platoon of the University, Technical High School and all institutions where technical education is needed. The content of the training set is suitable for advanced technical training, including basic training. The equipment in the system and the operation of the system can be observed from all angles. While the system is in operation, it is supported by liquid flow paths, transparent pipes and apparatus, making it possible to observe the process. The platform on which the system is positioned is on easy-to-move and lockable wheels. The entire panel consists of durable materials.

## TRAINING SET

## TRAINING SET MODULES

- Orifice Plate
- Flow Meters
- Liquid Tank
- Ball Valve
- Circulation Pump
- Electrical Protection Equipment
- Digital flow and differential pressure gauge
