

# MONO PHASE ELECTRICAL CONTROL COOLING TRAINING SET

Mono Phase Electrical Control Cooling Training Set is designed to explain the working mechanism of the system practically. Equipments can be observed from every angle. In this way, it is possible to recognize the equipment and observe the logic of its working operation. All elements that have been used in the training set are in the same structure as an industrial life. The platform has mobile caster. The entire panel consists of durable materials.

## TRAINING SET

## TRAINING SET EQUIPMENT

- Voltmeter
- Ammeter
- CosØ Meter
- Defrost Relay
- Time Relay
- Leakage Protection Relay
- Potential (Voltage) Relay
- PTC Relay
- Current Relay
- PTC Thermic
- Permanent Capacitor
- Compressor Motor
- Signal Light
- Control Unit
- Heater
- Control Fuse
- Cooling and Fan Thermostat
- Bimetal Thermic
- Start Capacitor
- PC Connection (Optional)
- Magnetic Relay
